Company Introduction

Background and Industries

Company Overview

Founded by a certified calibration laboratory manager, with technical sales and in field experience, ROMAP Consulting is a proudly independent service provider specializing in calibration, maintenance, and sales of industrial process instrumentation. With a strong foundation built on years of hands-on field experience, ROMAP delivers accurate, reliable, and industry-compliant solutions to keep your systems performing at their best with traceability to SANAS and ISO 17025 standards.

About Our Founder

After over a decade of working in diverse industrial environments—from oil & gas and manufacturing to food processing and utilities—ROMAP recognized a growing demand for personalized, trustworthy calibration services and quality instrumentation products. Combining technical expertise with a passion for precision, he launched ROMAP, with a mission to raise the standard of instrumentation support for small to mid-sized businesses across the region.

With natural expansion to assisting countries in Africa.

Industries we serve:

- Oil & gas
- Water & wastewater
- Manufacturing
- Pharmaceuticals
- Food & beverage
- Power generation
- Mining

Our Standards

Our Mission & Vision

Guiding Principles and Future Aspirations

Our Mission

To provide precision, reliability, and peace of mind through expert calibration services and trusted instrumentation solutions.

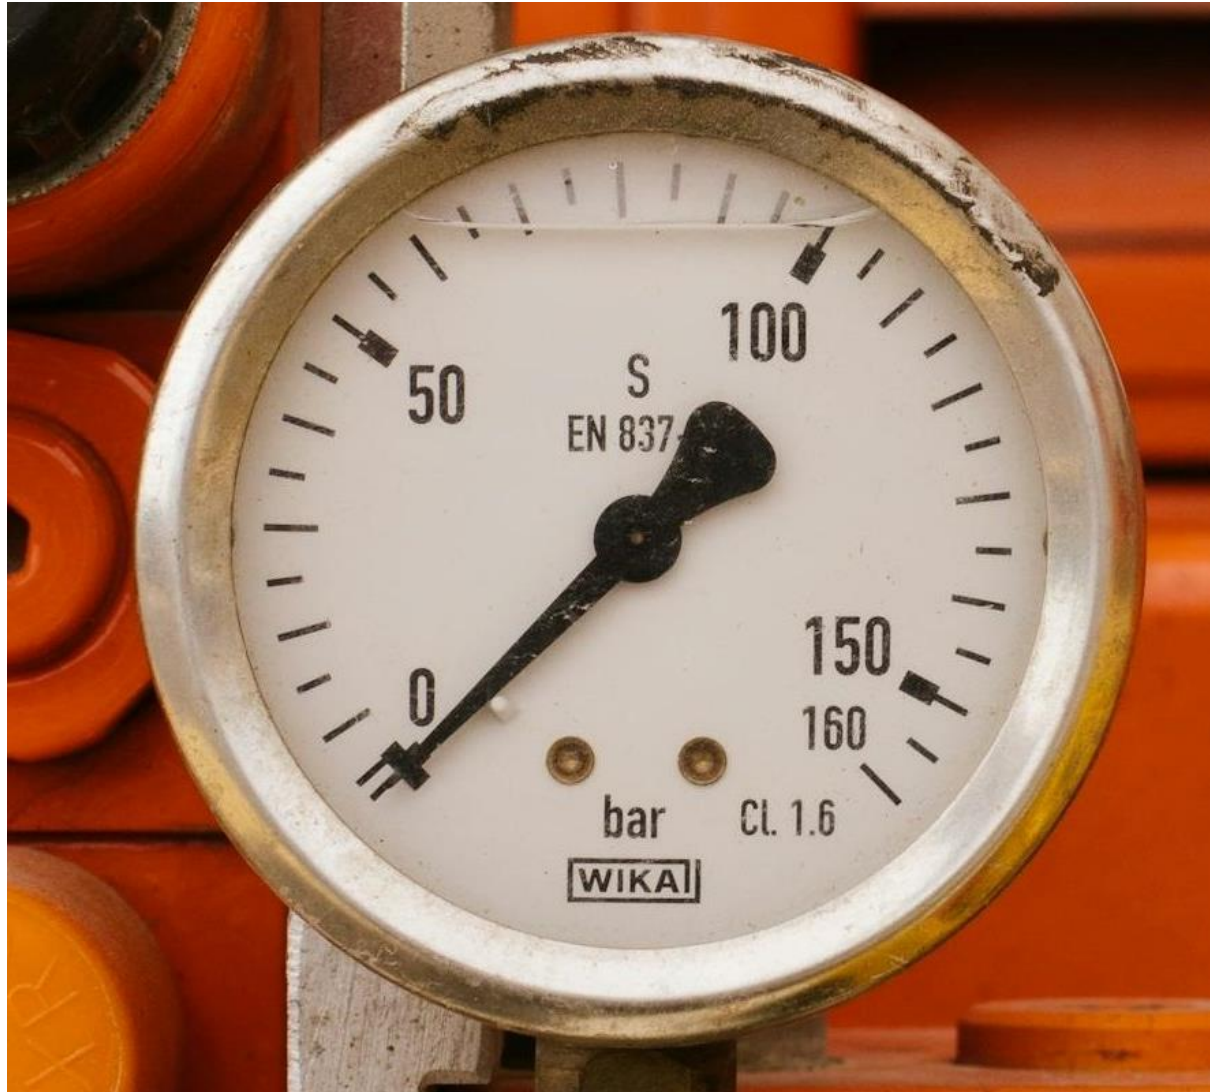

Our Vision

To become the go-to partner for instrumentation needs across the Sub-Saharan region by building strong partnerships & service-first relationships and delivering excellence at every level.

03

Our Services

Current Projects and Innovation Initiatives

Calibration Services

- Pressure, temperature, flow, level, mass, dimensional, analytical, and electrical instrumentation
- On-site and in-house calibration options
- ISO 17025-compliant documentation
- Preventive maintenance programs
- Consulting

Process Instrumentation Sales

- Distributor of top-rated brands in pressure instrumentation, RTDs, thermocouples, level sensors, flow meters, gas detection, and more.
- Application consulting and equipment selection support.

Installation & Commissioning

- Full-service setup and verification of new equipment.
- Loop checking and control system integration.

Technical Support & Troubleshooting

- Fast-response diagnostics.
- Performance optimization.
